PROFILE

Trained in territorial and public policy analysis, I use data, socio-economic diagnoses and territorial observation to identify the dynamics, needs and imbalances of a territory. My career has led me to work on territorial development, employment, land and planning issues within several public institutions. Experienced in conducting studies, producing decision-support tools and working with a wide range of stakeholders, I now wish to put these skills to work for employment development and support for territories.

PROFESSIONAL EXPERIENCE

Research Officer — DDT de l'Oise (Departmental Directorate of Territories) Apr 2026 – Nov 2026
Departmental Agricultural Project (PAD), agricultural land component *Beauvais, France*

- Contributed to the territorial and land diagnosis at departmental level.
- Structured, cross-referenced and analysed data to objectively assess land dynamics.
- Contributed to building a departmental dashboard on changes in agricultural land.
- Set up data visualisation tools on land consumption and land-use planning projects.
- Produced analytical notes and decision-support material for public stakeholders.
- Took part in meetings with institutional stakeholders on land and territorial issues.

Research Officer — DREAL Grand Est (Regional Directorate for Environment, Planning and Housing) Apr 2025 – Aug 2025
Assessment of citizen participation in the Grand Est region *Grand Est, France*

- Designed a survey protocol combining questionnaires and semi-structured interviews.
- Collected, processed and analysed the data gathered.
- Analysed the results and identified territorial dynamics.
- Wrote an analytical note for decision-makers.
- Mapped the results in QGIS to visualise territorial dynamics.

Territorial Project Analysis and Monitoring Assistant — Ministry of Development Planning and Cooperation Mar 2024 – Jun 2024
Development of the National Land-Use Planning Scheme (SNAT-2045) *Lomé, Togo*

- Took part in a national strategic planning and land-use planning process.
- Contributed to writing territorial diagnoses and analysing territorial dynamics.
- Took part in drafting and revising the components of the SNAT: strategy, prospective scenarios, guidelines and programmes.
- Contributed to the scheme's monitoring and evaluation framework.
- Facilitated consultation workshops with a range of stakeholders.
- Produced activity reports and summary notes for decision-makers.

Research Officer — Municipality of Agoè-Nyivé 2 Apr 2024 – Sep 2024
Territorial diagnosis of economic attractiveness factors *Togo*

- Carried out a territorial diagnosis focused on economic attractiveness factors.
- Designed and administered a questionnaire for businesses and residents.
- Analysed economic, social, environmental and demographic dynamics.
- Identified levers for attractiveness and territorial development.
- Wrote a strategic report.
- Presented the findings and proposals to local decision-makers.

PROJECTS

Employment & Territory Diagnosis Sep 2024 – Apr 2025

Sens employment area

- Analysed the demographic, economic and social characteristics of the area.
- Analysed employment dynamics and the local economic fabric.
- Identified sectors and occupations with specific needs.
- Analysed gaps between employers' needs and jobseekers' profiles.
- Compared the area's dynamics with those of the region.
- Identified priority issues for employment and territorial development.
- Formulated courses of action and recommendations.

Decision-Support Tool — "Thermal Oven" Housing Sep 2024 – Apr 2025

Dijon metropolitan area

- Developed a decision-support tool to identify "thermal oven" housing (homes that overheat in summer).
- Analysed the factors affecting housing comfort.
- Designed an interactive QGIS decision-support dashboard.

SKILLS

Territorial diagnosis and development • Analysis of economic and territorial dynamics • Territorial observation • Data collection, processing and analysis • Statistical analysis • Econometrics • Public policy evaluation • Dashboard design • Project engineering and monitoring • Meeting and workshop facilitation • Writing notes and reports • Mapping and spatial analysis

Statistical and GIS tools: R, Stata, SPSS, EViews, QGIS, Python

Data collection tools: SurveyMonkey, KoboCollect

Office tools: Word, Excel, PowerPoint, LibreOffice, Grist

EDUCATION

Master's Degree in Applied Economics
Track: Statistical Expertise for Economics *University of Lorraine, Metz – France*

Master's Degree in Applied Economics
Track: Territorial Economics and Governance *Université de Bourgogne Europe, Dijon – France*

CERTIFICATES

Territorial Attractiveness and Place Marketing: the Fundamentals (French National Centre for Local Civil Service, CNFPT)

Feasibility Study and Environmental and Social Assessment (French Development Agency, AFD)

LANGUAGES

French: native • English: intermediate
